EXPERIENCE

University Of Pretoria

Assistant Lecturer
Aug 2026 - Present

Currently serving as an Assistant Lecturer, helping students understand key concepts in information systems, including hardware, software, data management, computer networks, and systems analysis. Support students through discussions, academic guidance, and assisting with assessments and coursework.

Teaching Assistant
Feb 2025 - Jun 2026

Served as a Teaching Assistant across first and second-year Informatics modules, supporting students in foundational C# programming, computer networks, and Excel. Provided hands-on guidance during lectures, practicals, and one-on-one consultations, facilitated interactive tutorial sessions, and evaluated assignments, coursework, and semester assessments while providing constructive feedback to support student learning and development.

Chiropractic Association South Africa — *Software Developer*
Mar 2026 - Present

Maintain and enhance a cross-platform application ecosystem consisting of an Angular/Ionic progressive web application and native Android and iOS deployments, using Capacitor to support shared functionality across platforms.

Develop and maintain frontend features and backend integrations using TypeScript, Node.js, Express.js, and REST APIs, while working with relational data and cloud-based services to support application functionality.

Diagnose and resolve production issues across web and mobile environments, investigating application behaviour, API responses, and platform-specific issues to maintain reliability and performance.

Serve as the primary technical point of contact for end users, translating reported issues into actionable technical changes and providing structured troubleshooting and support.

SmartMob — *Software Developer*
Jan 2025 - Feb 2026

Developed and maintained Angular/Ionic applications deployed across web, Android, and iOS, implementing frontend features, REST APIs, authentication, and backend integrations.

SKILLS

AI/ML: PyTorch, TensorFlow, scikit-learn, NumPy, Agentic AI

Soft:

Teamwork, Communication, Problem-Solving, Teaching.

LANGUAGES

English - Fluent
Arabic - Fluent

VOLUNTEERING

Jiu-jitsu Coach

(2024 - Present)

Deliver foundational Brazilian Jiu-Jitsu classes, guiding students through core techniques in a welcoming training environment.

Keep that gold shining *(2024)*

Designed and delivered a foundational computer literacy course to learners at a school in an under-resourced community.

EDUCATION

Computer Science — BScHons,
University of Pretoria
2026-Present

Information & Knowledge Systems — BSc,
University of Pretoria
2023 - 2025

High School - NCSCOS,
North American International School
2018 - 2022

PROJECTS

Portfolio Portal— *Capstone Project (EPI-USE)*

Developed a full-stack platform that extracts CV information using OCR and AI, then generates personalized 3D portfolio websites. Built with React, Vite, Node.js, Supabase, and Three.js, with multiple interactive 3D environments and automated CV data processing.

CozyPaw — *Personal Project*

Designed and developed a responsive website for a pet-sitting business, providing prospective clients with information about services, pricing, and service areas while enabling direct contact with the business.
cozypaw.co.za

Portfolio Website — *Personal Project*

Designed and developed a personal portfolio website to showcase my software development experience, technical skills, and projects through a responsive, interactive web interface.
